DRONE

Roof Inspections

Efficient, Safe, and Detailed: Revolutionizing Roof Inspections with Drone Technology and AI!

Better Access

Harnessing state-of-the-art AI technology, roof anomalies are detected by an autonomous drone, resulting in a more accurate and safe roof inspection.

Better Viewing & Images

Captures ultra-high resolution images with complete coverage of the roof creating a 3D map of the property using state-of-the-art technology to identify any potential problems.

Better Use of Time

Drone inspection can take an average of 30 minutes and does not require the presence of the homeowner, creating opportunity for regular roof inspections.

Better Safety

Drones can access difficult or dangerous-to-reach areas without risking the safety of a human inspector, especially on steep or slippery surfaces.

Roof Inspection & Damage Assessment Powered by AI

We've partnered with EagleView Technologies® to provide you with the most accurate inspections using autonomous drones and damage detection technology. These advanced artificial intelligence tools combined with real-time imagery produce highly accurate building measurements and damage assessments. Fully autonomous drones deliver clear and consistent property imagery, precise roof area measurements, AI-powered damage detection, and automated reports to streamline insurance claims and storm repairs, estimate material requirements and enhance safety by providing the property details without the need to climb on to the roof.

Professional

We are professionals and well-versed in all types of roofing systems.

Experts

We are experts and use the right equipment to install and service your roof.

Safety First

We use an OSHA approved safety plan which protects our crews and our customers.

Highly Skilled

All our staff are properly trained in the latest roofing techniques and processes.

GAF Certified Contractors

Hire an Experienced Roofing Contractor

Our teams are based in North Georgia and have the reach to support the greater southeast. Over the last decade, we have grown to become a GAF Master Elite / Master Commercial Contractor with projects completed in 8 states.

The key to our success is our customers. We have great respect for our customers and we strive to communicate precise expectations on every job. Our crews are prompt and courteous, always putting the customers' needs at the forefront of every project. Using state-of-the-art equipment, technology, and materials, our highly skilled roofing professionals are capable of handling any project regardless of size, location, or complexity.

Protect Your Home by Keeping Your Roof in Good Shape

Your home is one of the biggest investments you'll make. Your roof protects your home from water damage, structural issues and pest infestations. Don't put your property at risk—hire Roof U.S. for your roofing services. We can efficiently identify and repair any issue you may be experiencing. If the damage is too severe and you need a new roof, we can install it.

We are a certified GAF Master Elite shingle installer which enables us to offer the GAF Golden Pledge Warranty backed by GAF, North America's largest producer of roofing materials. Less than 2% of all roofing contractors are awarded this certification so you can rest easy knowing that your roof is in the right hands.
